

Product Comparison: The Advantages of Symantec Endpoint Protection Small Business Edition 2013

Detailed Features	Symantec Endpoint Protection Small Business Edition v12.1	Symantec Endpoint Protection Small Business Edition 2013	Description
Security			
Signature Detection	✓	✓	Traditional malware detection technologies.
Intrusion Prevention System	✓	✓	Scans network traffic for indications of intrusions or attempted intrusions.
Symantec Insight™	✓	✓	Insight separates files at risk from those that are safe, for faster and more accurate malware detection.
Real-time Heuristics	✓	✓	Monitors files as they execute for malicious behavior.
Real-time SONAR 3	✓	✓	Replacing Symantec TruScan™ technology, this version of SONAR examines programs as they run, identifying and stopping malicious behavior even of new and previously unknown threats.
Browser Intrusion Prevention	✓	✓	Scans for attacks directed at browser vulnerabilities.
Symantec Endpoint Protection for Mac®	✓		Endpoint protection for Mac OS X® managed through the Symantec Endpoint Protection Manager.
Dynamic Security Risk Categories	✓	✓	Sets policies on application use by the risk rating of each application.
Download Symantec Insight	✓	✓	Tells you whether a file is risky before you install it.
File Symantec Insight	✓	✓	Informs of the risk, source, and performance impact of files and processes.
Auto Remediation of Infected Clients	✓	✓	Symantec Endpoint Protection client will flag infections that could not be removed. When new definitions arrive, it will scan those files at the next system IDLE in attempt to repair/clean them.
Cloud Scan	✓	✓	Checks online for the most recent risk information for files and processes.
Windows 8 support		✓ ¹	Protection of computers and tablets running Windows 8.
Local Update Service		✓ ²	Reduce network bandwidth usage by assigning a local computer to connect to the internet to get latest security software and content updates and then share with other computers on the LAN.
USB Device Control		✓ ²	Ability to detect and protect against harmful files from USB storage devices.
Management			
On-premise management only	✓		On-premise deployment with an onsite management server.
Management Choice		✓	Cloud-managed service with a completely cloud-managed infrastructure without need for a server. Or, customers have the option of selecting on-premise management with an onsite server.
Client Deployment Wizard	✓	✓	Improved wizards and more deployment options will allow new installs and upgrades to be faster and easier than ever before.
Centralized Management Console	✓	✓	Single management console.
Customizable widgets		✓ ²	Hosted dashboard with customizable widgets.
Create and organize groups	✓	✓	Ability to create and organize groups.
Set and apply security policies	✓	✓	Ability to set and apply security policies for groups.
Define different roles/logins	✓	✓	Define different roles/logins for additional users and administrators.
Generate reports	✓	✓	Generate multiple reports which can be exported into multiple formats.
Email Notifications	✓	✓	Includes a set of frequently requested notifications enabled by default with improved presentation, including BlackBerry® support.
Pricing			
Subscription		✓	A simple subscription fee covers either cloud-managed service or on-premise management option.
